

Evidence Analysis:

1. Introduction

This task focuses on analyzing collected system and network evidence to identify suspicious activity and support incident investigation.

2. Objective

To examine system-level data such as network connections and processes to detect indicators of compromise and validate potential threats.

3. Tools Used

Command Prompt

4. Practical Execution

Step 1:

Open Command Prompt: `netstat -ano`

Step 2: Identify Suspicious Connection

Unknown external IPs

Established connections

Unusual ports

Step 3: Validate IP

Check IP in: VirusTotal

5. Evidence Table

Source IP	Destination IP	Port	Process
192.168.1.5	45.33.32.156	443	chrome.exe
185.225.69.10	197.0.3.2	8080	unknown.exe
10.0.2.15	192.2.0.0	443	unknown.exe

6. Analysis:

A suspicious outbound connection was identified from the system to IP 185.225.69.10 over port 8080. The connection was established by an unknown process, which is unusual compared to normal browser traffic. This behavior may indicate command-and-control communication.

The screenshot shows the VirusTotal web interface for the IP address 10.14.50.161. The interface is dark-themed. At the top, there's a navigation bar with tabs for 'DETECTION', 'DETAILS', 'RELATIONS', and 'COMMUNITY'. The 'DETAILS' tab is active. Below the navigation bar, there's a section for 'Security vendors' analysis'. It shows a table with columns for 'Vendor', 'Status', and 'Analysis'. The table lists various security vendors and their analysis results for the IP address. The status for all vendors is 'Unrated'. The table is scrollable. At the bottom of the table, there's a link to 'Join our Community'.

The screenshot shows the AbuseIPDB web interface for the IP address 10.14.50.161. The interface is light-themed. At the top, there's a navigation bar with tabs for 'Report IP', 'Bulk Checker', 'Bulk Reporter', 'Pricing', 'Integrations', 'Docs', 'IP Utilities', 'Contact', and 'More'. The 'Report IP' tab is active. Below the navigation bar, there's a section for 'Check an IP Address, Domain Name, Subnet, or ASN'. It shows a search bar with the IP address 10.14.50.161 entered. Below the search bar, there's a message that says '10.14.50.161 was not found in our database'. It also includes an 'Important Note' about private IP addresses. At the bottom, there's a section for 'Recently Reported IPs' which lists several IP addresses with their respective flags and counts.
